

# Governance Workshop

Proposed **structure** of the Delà Got'ine  
Government

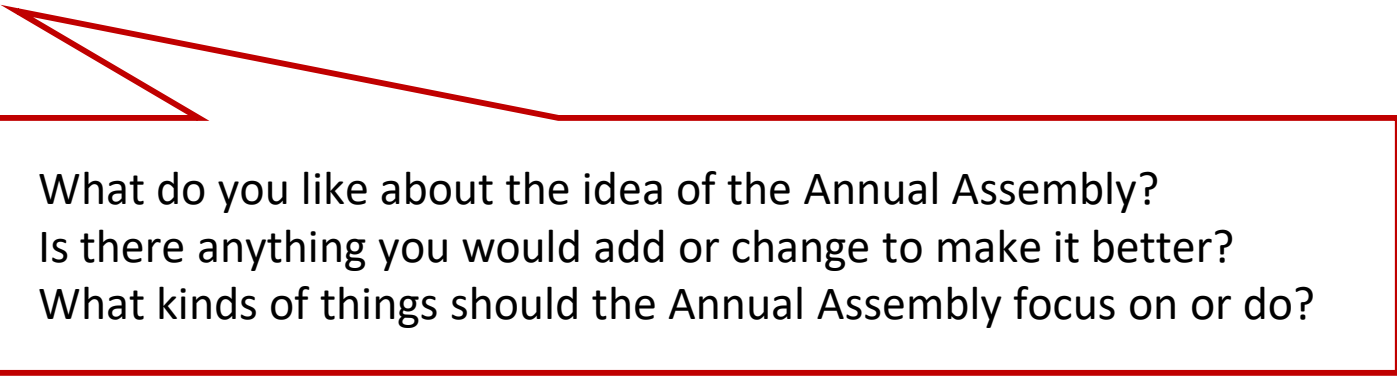

# Annual Assembly

All citizens will have a role in the new form of government through the Community Assembly.

The job of the assembly would be to help the government, by discussing important laws and decisions before they are finalized and give direction to the government on important issues.

The People's Assembly could do things like:

- review annual budgets
- review the annual strategic plans of the government
- be consulted on plans for new laws or in developing the laws
- be directly involved in any changes to the constitution or the structure of government

- 
- What do you like about the idea of the Annual Assembly?
  - Is there anything you would add or change to make it better?
  - What kinds of things should the Annual Assembly focus on or do?
